Adopt an Endangered Animal

Polar bears are the largest carnivores that live on land. They have thick white fur which helps to keep them warm. Polar bears also have big front paws which help them to swim. They are excellent swimmers and can stay under water for up to two minutes at a time.

These large white bears live in the Arctic Circle. It is very cold there, with icebergs in a freezing cold sea. When it gets really cold in the winter, polar bears stay under the snow in a den.

Polar bears hunt and catch seals and other animals such as foxes and birds for food. They also eat fish and other animals which live in the sea. If a polar bear finds a dead whale or walrus, it will eat that, too.

Polar bears are an endangered species. People used to hunt and trap them for their fur, and at one time there were only 5,000 polar bears left. Now, polar bears are protected and they can only be hunted by Eskimos using traditional ways. Today, there is a new danger. Pollution and global warming are damaging the habitat of these beautiful animals.

What can you do to help?

We at Swanley have started an 'Adopt an Animal' scheme. You can adopt an animal as:

- an individual
- a family
- a group (e.g. school, club, company)

If you donate £30, this will help us to keep a polar bear at Swanley Animal Park for three months. We will also send some of the money to help preserve the natural habitat of polar bears in the wild.

What will you get?

- an adoption certificate
- a colour photograph of the polar bear you adopt at Swanley
- a sticker for your car
- a free Swanley Park Newsletter

How do you pay?

- by post - cheque, money order
- by telephone - credit card, debit card

For adoption information or donations, contact Swanley Animal Park.
